## Four ITT engineers honored as 'Modern Day Technology Leaders' at 2010 BEYA Science, Technology, Engineering and Math Conference

**BALTIMORE, Md., Feb. 19, 2010** - ITT Corporation (NYSE:ITT) congratulates four of its talented engineers who were recognized as "Modern Day Technology Leaders" during the Black Engineer of the Year Awards (BEYA) Science, Technology, Engineering, Math or "STEM" Conference award ceremony in Baltimore, Md.

The ITT engineers were acknowledged for demonstrating excellence in engineering and the sciences. Winners were also selected for their significant contributions to key company programs, products and initiatives, along with their leadership dedicated to the field of engineering – at work and in the community.

**ITT's 2010 honorees include:**

- **Desroy Fletcher**, principal member technical staff for ITT Electronic Systems, was honored for his contributions to several key programs where his insight and innovations preserved the team's schedule and budget.
- **Donald Baptiste**, associate member technical staff for ITT Electronic Systems, was recognized for his commitment and contributions to several major ITT Electronic Warfare design efforts.
- **Phil Hohn**, value-based product development manager for ITT Electronic Systems, was selected for leading the implementation of a number of efficiency changes that have positively impacted the quality of company products.
- **Reggie Parker**, technical staff member for ITT Electronic Systems, was honored for his outstanding contributions to many mission-critical projects involving highly technological knowledge.

The “Modern Day Technology Leaders” were selected from hundreds of candidates in industry, government, academia and corporate America. Each winner was identified for their dynamic leadership styles, achievements in advancing access to technology, furthering technical literacy within their communities and for their exemplary role as mentors that help bolster the minority presence in the nation's technology sector.

“At ITT, we are committed to building a workforce that mirrors the world in which we do business,” said Dave Melcher, president of ITT Defense and Information Solutions. “Having innovative technology leaders on our team dramatically helps our company improve creativity, innovation, and ability to meet ever-changing customer needs, which is essential to achieving premier status in the defense and aerospace market.”

ITT Electronic Systems is a major international supplier of sophisticated, advanced military Electronic Warfare defense solutions to a broad range of government agencies. The work of this year’s winners provides our warfighters with the assurance that the equipment they use is reliable, safe and secure.

Since its inception in 1986, BEYA has attracted top professionals from every part of the nation and every field of science, engineering and technology and offers a forum for the brightest technology minds in the country to discuss the most important engineering and science-related issues facing the nation.
