NEWS RELEASE:

ITT to equip U.K. Ministry of Defence with night vision

ROANOKE, Va., August 19, 2008 – ITT Corporation (NYSE:ITT) announced today that its Night Vision business was awarded a \$23 million contract by the United Kingdom's Ministry of Defence (MoD) for Head-Mounted Night Vision Systems (HMNVS). Through the agreement, Roanoke, Va.-based ITT Night Vision will continue to equip the U.K. military with the HMNVS and provide in-support services.

The HMNVS contract is ITT's second from the U.K. MoD. ITT was awarded the initial HMNVS contract in 2002 to provide a continuous supply of HMNVS and Contractor Logistics Support (CLS). Under the initial contract, the Roanoke-based facility provided the systems and the Contractor Logistic Support. In 2005, ITT Night Vision began working closely with their sister division, U.K. Defence Ltd, to provide expedited, in-country maintenance for quicker repairs. The Roanoke-based facility will continue to provide the units, and ITT Defence, Ltd., will provide maintenance support.

"We are happy to continue supporting one of our key international allies," said Mike Hayman, president of ITT Night Vision. "Our goal is to continue to support the international market through growing relationships, such as this one with the U.K. Ministry of Defence."

The HMNVS is the U.K. MoD variant of the AN/PVS-14, which is most commonly used by the U.S. military, allied military forces and homeland security agencies. The HMNVS is a lightweight, single-battery monocular unit that provides enhanced mobility and reliability for soldiers during ground-based operations.

ITT Night Vision, based in Roanoke, Va., is the world's leading developer, producer and supplier of Generation 3 image intensifier technology for U.S. and allied military forces, as well as the homeland security market. To learn more, visit www.nightvision.com.

About ITT Corporation
