NEWS RELEASE:

## ITT awarded \$16.6 million Night Vision Goggle order from the United Kingdom

**LONDON, Sept. 9, 2009** - ITT Corporation (NYSE: ITT) has been awarded a \$16.6 million follow-on order from the United Kingdom Ministry of Defense (MoD) for the Head Mounted Night Vision System (HMNVS). The award is a follow-on order to the \$23 million contract awarded to ITT in August 2008, to continue to supply the U.K military with HMNVS and in-support services.

"This follow-on order allows us to maintain our support to the Coalition forces that continue to perform critical nighttime missions," said Mike Hayman, president and general manager of ITT's Night Vision business. "With this award, we are increasing our international footprint with our key allies and providing them an indispensable weapon for nighttime operations."

The HMNVS is the MoD's variant of the AN/PVS-14, which is commonly used by the U.S. military and homeland security agencies. This is a lightweight, single-battery monocular equipped with ITT's Generation (Gen) 3 night vision technology, the most advanced night vision in the field today. ITT's Gen 3 goggles provide the clearest, sharpest image available for soldiers performing nighttime operations that give them the advantage on the battlefield. ITT Gen 3 goggles last in excess to 10,000 hours, compared to the Gen 2 tubes that last approximately 2,000 to 4,000 hours.

ITT's Night Vision business, based in Roanoke, Va., is the world's leading developer, producer and supplier of head- and helmet-mounted night vision solutions and image intensifiers for U.S. and allied military forces, as well as the homeland security market. ITT has served the U.S. military with premier research, development, production and logistics for analog and digital fusion solutions for 50 years. ITT delivered its one millionth Gen 3 image intensification tube in 2007. To learn more, visit [www.nightvision.com](http://www.nightvision.com)

### **About ITT Corporation**

ITT Corporation is a high-technology engineering and manufacturing company operating on all seven continents in three vital markets: water and fluids management, global defense and security, and motion and flow control. With a heritage of innovation, ITT partners with its customers to deliver extraordinary solutions that create more livable environments, provide protection and safety and connect our world. Headquartered in White Plains, N.Y., the company generated 2008 sales of \$11.7 billion. [www.itt.com](http://www.itt.com)
