**January 7, 2010**

A restructuring at ITT should not affect the company's operation in Roanoke.

The company is realigning the night vision operation with another operation in Rochester, New York.

The group's headquarters will be based there, but ITT says nightvision manufacturing will stay in Roanoke. The company says it will look at administrative consolidation as it works to remain competitive.

ITT Nightvision employs about 1,500 people in the Roanoke area.
